MISSION AND DESCRIPTION								
The AV-8B is a single place, close-air support, light attack aircraft with vertical and short takeoff and landing capability. Its primary mission is close-air support, a mission in which the unique basing flexibility of V/STOL allows operation from ships or unprepared short bases in close proximity to the battle area, providing rapid response to the ground commander. Secondary mission capability includes interdiction and combat air patrol or deck launched intercept.								
The AV-8B has a raised cockpit with wraparound windshield and a shoulder mounted, swept wing with marked-negative dihedral. The wing includes a large, single slotted flap, drooped ailerons in the high lift configuration, and a Leading Edge Root Extension (LERX). Conventional aerodynamic controls are used in wingborne flight and engine bleed air reaction controls are used in jetborne flight with a mix of two systems being used when transitioning between modes of flight. The aircraft is powered by a Rolls-Royce Pegasus fan jet engine and has two side inlets and four exhaust nozzles which may be rotated to provide thrust vectoring for V/STOL operations or to enhance inflight maneuvering. The landing gear consists of a nose gear and a single main gear mounted in bicycle or tandem arrangement and two outrigger gear located approximately mid-span on each wing between the flap and aileron. Lift Improvement Devices (LIDS) consisting of two longitudinal strakes and a retractable forward fence mounted on the lower fuselage between the nose and main gear, are provided to improve performance in vertical takeoff or landing. The hydraulically operated speedbrake is located on the lower fuselage surface immediately aft of the main landing gear.								
The AV-8B has six wing stations and one fuselage station for external stores and may carry an external fuselage mounted 25 mm gun pack and ammo pack. Fuselage strakes are interchangeable with the gun and ammo pack. External fuel may be carried on four of the wing stations. The aircraft is equipped with a Stability Augmentation and Attitude Hold System (SAAHS) with a departure resistance system and pilot relief modes for wingborne flight, an Angle Rate Bombing System (ARBS) and a Head Up Display (HUD). Other features include a self-contained start system, Stencil SJU-4/A ejection seat and an OBOGS system. A retractable inflight refueling probe may be added to the aircraft if required. The wing, forward fuselage and stabilator are fabricated of composite structure.								
FUEL, OIL AND WATER								
			FUEL					
			NO. TANKS	GALLONS	LOCATION			
			5	416	Fuselage, integral			
			2	725*	Wing, integral			
			2/4	564 / 1,164	Wing, external, drop			
			Grade	JPA4 or JP5				
			Specification	MIL-J-5624				
*Increased to 748 when external fuel is carried								
			OIL					
			Integral with engine		2.4 gal.

Notes:

(A) Includes 260 lb of water consumed at takeoff

(E) Maximum altitude 29,332 ft

(H) External fuel tanks dropped when empty

(B) Short lift wet, 15 second rating, standard day

(F) External fuel tanks retained when empty

(I) Mission time excludes warmup, takeoff, and 10 min loiter reserve

(C) Combat thrust, 10 minute rating

(G) Ferry range is 2,135 NM if tanks are dropped when empty

(J) Performance basis - flight test (MDC A9847)

(D) Maximum altitude 27,209 ft

NOTES:

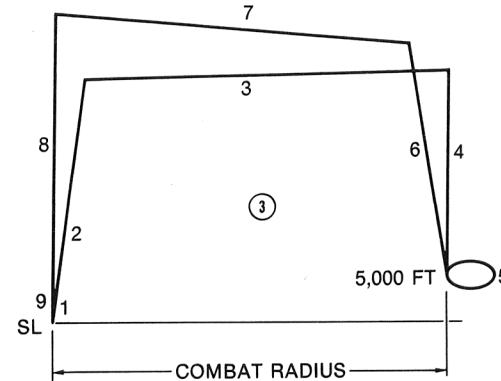

HI-HI-HI MISSION

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to optimum cruise altitude at maximum thrust.
3. CRUISE OUT: At altitudes and speeds for maximum range. External tanks dropped when empty.
4. COMBAT FUEL ALLOWANCE: (5) minutes at M_{max} at combat thrust. Drop stores after combat.
5. CRUISE BACK: At altitudes and speeds for maximum range.
6. DESCENT: To sea level. No fuel, time or distance credited.
7. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

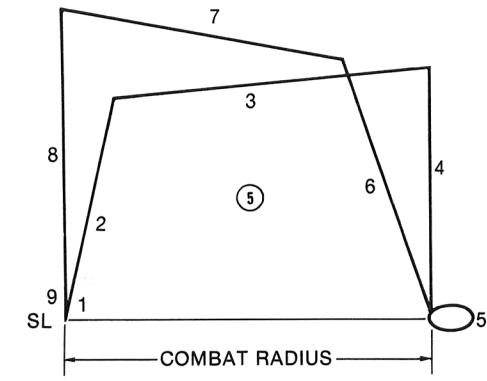

CLOSE-AIR SUPPORT MISSION

1. WARM-UP, TAKEOFF AND ACCELERATE (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to optimum cruise altitude at maximum thrust.
3. CRUISE OUT: At altitudes and speeds for maximum range. External tanks dropped when empty.
4. DESCENT: To 5,000 feet. No fuel, time or distance credited.
5. LOITER: One hour at 5,000 feet at maximum endurance speed. Drop stores after loiter.
6. CLIMB: On course to optimum cruise altitude at maximum thrust.
7. CRUISE BACK: At altitudes and speeds for maximum range.
8. DESCENT: To sea level. No fuel, time or distance credited.
9. RESERVE: 5% of total initial plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

HI-LO-HI MISSION

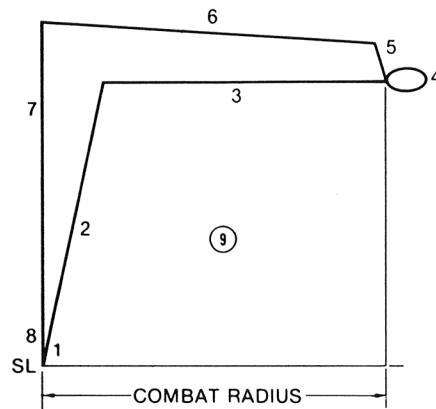

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to optimum cruise altitude at maximum thrust.
3. CRUISE OUT: At altitudes and speeds for maximum range. External tanks dropped when empty.
4. DESCENT: To sea level. No fuel, time or distance credited.
5. COMBAT FUEL ALLOWANCE: (5) minutes at M_{max} at combat thrust at sea level. Drop Stores after combat.
6. CLIMB: On course to optimum cruise altitude at maximum thrust.
7. CRUISE BACK: At altitudes and speeds for maximum range.
8. DESCENT: To sea level. No fuel, time or distance credited.
9. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

NOTES:

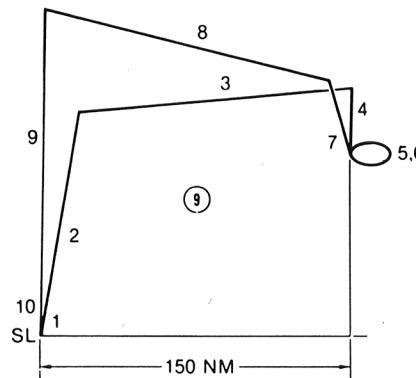

DECK LAUNCHED INTERCEPT MISSION

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to 30,000 feet at maximum thrust.
3. DASH OUT: At 30,000 feet at maximum continuous thrust.
4. COMBAT FUEL ALLOWANCE: (2) minutes at M_{max} at combat thrust. Retain missiles after combat.
5. CLIMB: On course from 30,000 feet to optimum cruise altitude at maximum thrust.
6. CRUISE BACK: At altitudes and speeds for maximum range.
7. DESCENT: To sea level. No fuel, time or distance credited.
8. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

COMBAT AIR PATROL

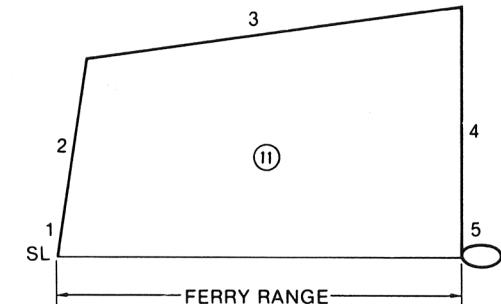

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to optimum cruise altitude at maximum thrust.
3. CRUISE OUT: To 150 nautical mile radius at altitudes and speeds for maximum range. External tanks dropped when empty.
4. DESCENT: From optimum cruise altitude to 30,000 feet. No fuel, time for distance credited.
5. LOITER: On station at 30,000 ft and speed for maximum endurance.
6. COMBAT FUEL ALLOWANCE: (2) minutes at M_{max} at combat thrust at 30,000 feet. Retain missiles after combat.
7. CLIMB: From 30,000 feet to optimum cruise altitude at maximum thrust.
8. CRUISE BACK: 150 nautical miles at altitudes and speeds for maximum range.
9. DESCENT: To sea level. No fuel, time or distance credited.
10. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

FERRY MISSION

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to optimum cruise altitude at maximum thrust.
3. CRUISE OUT: At altitudes and speeds for maximum range.
4. DESCENT: To sea level. No fuel, time or distance credited.
5. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

Note: For the Ferry Mission external tanks are retained unless noted otherwise

NOTES:

HI-LO-LO-HI MISSION

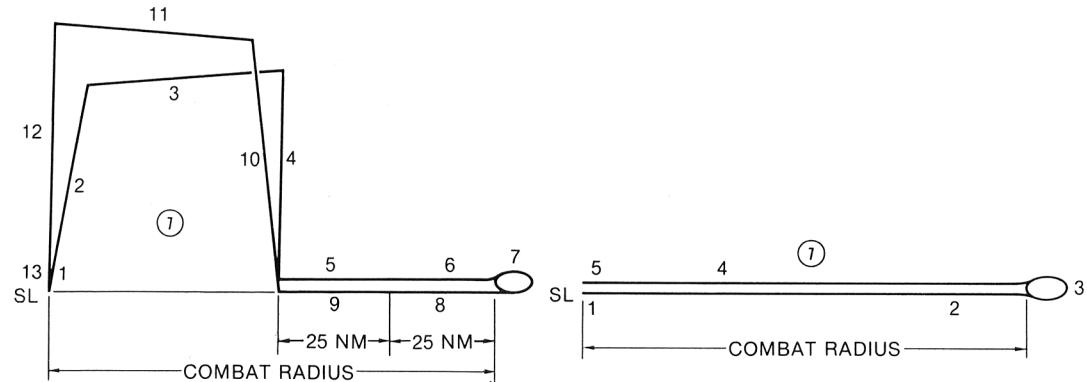

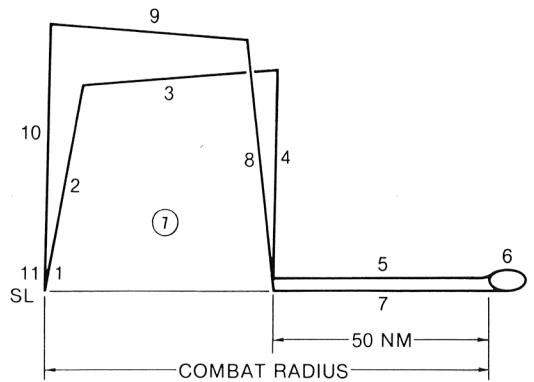

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to optimum cruise altitude at maximum thrust.
3. CRUISE OUT: At altitudes and speeds for maximum range. External tanks dropped when empty.
4. DESCENT: To sea level. No fuel, time or distance credited.
5. CRUISE: 50 nautical miles at sea level, at speed for maximum range.
6. COMBAT FUEL ALLOWANCE: (5) minutes at M_{max} at combat thrust at sea level. Drop stores after combat.
7. CRUISE: 50 nautical miles at sea level, at speed for maximum range.
8. CLIMB: On course to optimum cruise altitude at maximum thrust.
9. CRUISE BACK: At altitudes and speeds for maximum range.
10. DESCENT: To sea level. No fuel, time or distance credited.
11. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

MODIFIED HI-LO-LO-HI MISSION

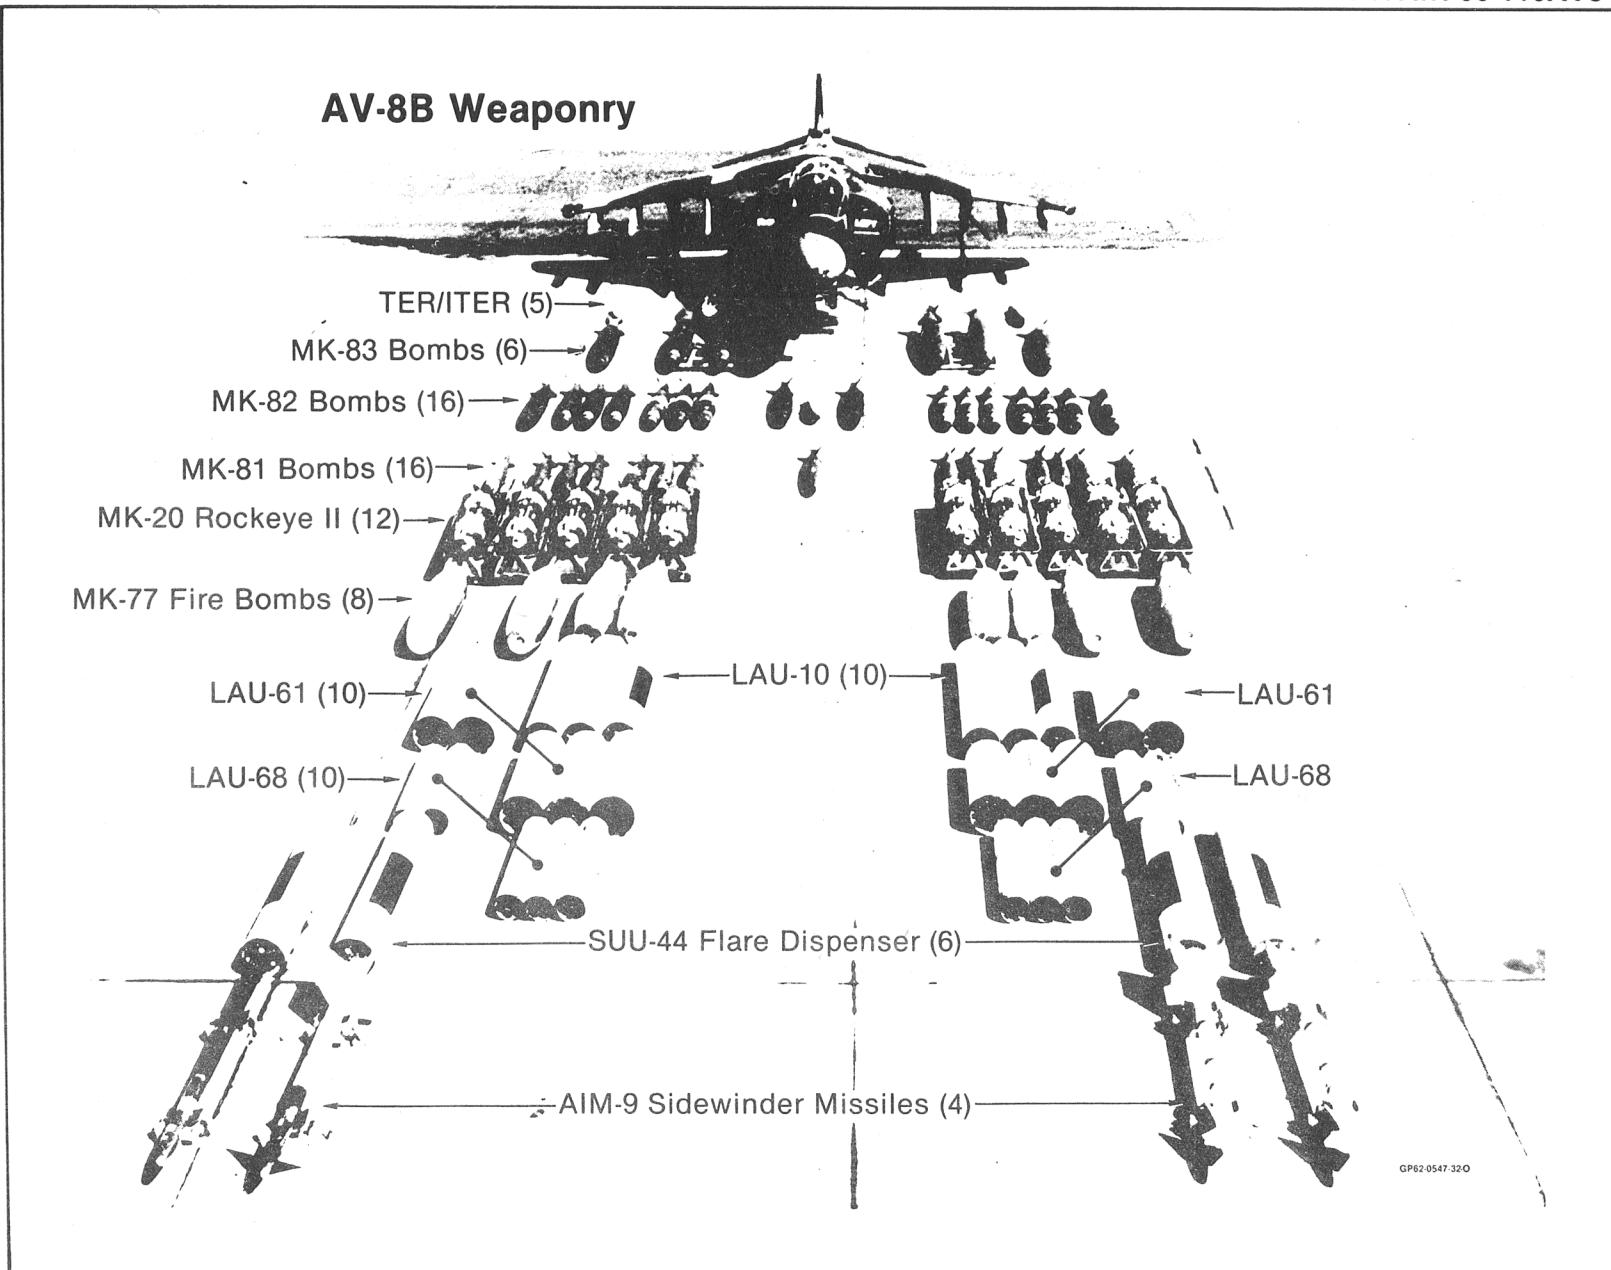

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CLIMB: On course to optimum cruise altitude at maximum thrust.
3. CRUISE OUT: At altitudes and speeds for maximum range. External tanks dropped when empty.
4. DESCENT: To sea level. No fuel, time or distance credited.
5. DASH: 450 KCAS at sea level for 25 nautical miles.
6. DASH: Mach 0.75 at sea level for 25 nautical miles.
7. COMBAT FUEL ALLOWANCE: (5) minutes at M_{max} at combat thrust at sea level. Drop stores after combat.
8. DASH: Mach 0.75 at sea level for 25 nautical miles.
9. DASH: 450 KCAS at sea level for 25 nautical miles.
10. CLIMB: On course to optimum cruise altitude at maximum thrust.
11. CRUISE BACK: At altitudes and speeds for maximum range.
12. DESCENT: To sea level. No fuel, time or distance credited.
13. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.

LO-LO-LO-MISSION

1. WARM-UP, TAKEOFF AND ACCELERATE: (2½) minutes at maximum continuous thrust plus (15) seconds at short lift wet rating.
2. CRUISE OUT: At sea level, at speed for maximum range. External tanks dropped when empty.
3. COMBAT FUEL ALLOWANCE: (5) minutes at M_{max} at combat thrust at sea level. Drop stores after combat.
4. CRUISE BACK: At sea level at speed for maximum range.
5. RESERVE: 5% of total initial fuel plus fuel for 10 minutes loiter at sea level at speeds for maximum endurance.
